SLIDE 2: The Agency Challenge vs. The ALPHAS Solution

Traditional Agency Traps	The ALPHAS OS Solution
✗ Scope creep & uncalculated delivery costs destroy margins.	✓ Strict 40% COGS Cap: Delivery costs locked before proposal is sent.
✗ Developers spend 50% of time pitching & handling client complaints.	✓ Dedicated Sales/AM (Areej): Devs & Media Leads focus 100% on execution.
✗ Misaligned sales incentives lead to bad deals.	✓ 15% Sales Closer Fee: Direct financial reward for deal closers.
✗ High fixed payroll overhead creates cashflow crises in slow months.	✓ On-Demand COGS Contractor Roster: EGP 0 fixed payroll risk.

SLIDE 3: The Business Model & Financial Architecture (v4.1)

Every Egyptian Pound (100%) of Gross Revenue cascades automatically through 5 locked accounts:

Gross Revenue (100%) → COGS Cap (40%) + Closer Fee (15%) + Gross Operating Profit (45%)

Operating Profit (45%) → Capital Reserve (25% of Op Profit) + Distributable Net Profit (75% of Op Profit)

REVENUE ALLOCATION BREAKDOWN (100%)		
COGS (Max 40%) Execution & QA	Sales Commission (15%) Deal Closer Fee	Gross Operating Profit (45%) Net Profit Pool & Reserves

- 40% COGS Execution Cap:** Direct budget for dev, media, software tools & freelancers.
- 15% Sales Closer Fee:** Direct commission paid to whoever closes the deal.
